

ANTI DRUG CONSUMPTION DATA ANALYTICS DASHBOARD

1. INTRODUCTION

Drug abuse is a major social issue that affects individuals, families, and communities. The objective of this project is to analyze anti-drug consumption data and provide meaningful insights through an interactive dashboard.

2. PROJECT OBJECTIVE

The main objectives of this project are:

- Analyze consumer demographics.
- Identify drug consumption patterns.
- Monitor crime history records.
- Analyze financial transaction details.
- Track supplier and associate networks.
- Support data-driven decision making.

3. DATASET DESCRIPTION

The dataset contains information related to:

- Personal Details
- Address Details
- Social Media Information
- Financial Transaction Details
- Identity Details
- Social-Economical Profile
- Drug Consumption Pattern
- Supply Chain Mapping
- Purchase Mode Analysis
- Crime History

Total Records: 1000

4. TOOLS USED

- Microsoft Excel
- Pivot Tables
- Pivot Charts
- Slicers

- Conditional Formatting

5. DASHBOARD FEATURES

KPI Cards

- Total Consumers
- Positive Cases
- Negative Cases
- Invalid Cases
- Active Cases

Interactive Filters

- Police Station
- Occupation
- Test Result
- Purchase Mode
- Crime Stage

Charts

- Occupation Analysis
- Consumption Duration Analysis
- Purchase Mode Analysis
- Crime Status Analysis
- Police Station Analysis

6. KEY INSIGHTS

- Identification of high-risk consumer groups.
- Analysis of purchase behavior.
- Crime history tracking.
- Supplier network analysis.
- Interactive filtering and reporting.

7. CONCLUSION

The Anti Drug Consumption Data Analytics Dashboard provides a centralized platform for analyzing consumer behavior, crime records, and operational patterns through interactive visualizations.
